11. Making the Draw

All draws shall be conducted in public with at least 2 players present, one of whom shall be of a different nationality other than the host country.

A) Guidelines for conducting a draw at African 14 & U Circuits:

If there are two players from the same National Association competing they shall be drawn in opposite halves of the draw.

If there are three or four players from the same National Association competing, the first and second ranked shall be drawn as above and the third and fourth ranked players shall be drawn into the remaining quarters.

The ranking of the first four players from a given country shall be based on the African ranking of its category, the ITF Junior Ranking if existing, or in the absence of these both rankings, the order of merit supplied by the appropriate National Association.

B) Method for conducting a draw

1) Prepare a master player sheet listing all nations represented. The order of nations is based on the number of players of that nation (i.e. the nation with the highest number of players should be listed first).

Detail then the players representing each nation as follows:

* First listed should be those players nominated by their National Association as their top players (maximum four) in order of ranking.

* If no ranking is available, or if no order of merit is supplied by the National Association, the top players (maximum four) should be ranked by their coach/captain. If he is not able to rank them, players should be ranked by the tournament organisers.

*Once players have been listed, all remaining players from each nation who have been accepted for the main draw should be listed in ranking order, if appropriate, or in order of acceptance.

2) Proceed with the draw of seeded players, bearing in mind that if two or more seeded players are from the same nation, their position in the draw must be placed rather than drawn by lot, in order to ensure that they are in a different half or quarter to the other top player(s) from their nation.

3) Proceed with the draw of the remaining top players (maximum four) from each nation, where appropriate, into the vacant half or quarters of the draw.

4) Once the top players (maximum four) from each nation have been drawn into an appropriate half/quarter and placed on a line, all remaining players should be numbered and drawn for position in the usual manner, i.e. drawn to the first vacant position at the top of the draw and so on.

The same procedure described from points 1 to 4 applies to the qualifying draw bearing in mind that the qualifying draw refers to sections rather than to quarters.

This means that if a Nation has five players in the Qualifying draw the first four must go in different sections and the fifth will be drawn anywhere.

On the other hand if a nation has a total of four players (two in the main draw and two in the qualifying draw) the two in the main draw must go in different halves of the main draw and the two of the qualifying draw must go in two different sections.

Note: This procedure does not apply to Doubles Draw.

C) Seeding Official – Withdrawal and replacement of Seeds:

Seeding will not be official until the final draw is made. The latest available rankings shall be used. If the players do not have African 14 & U ranking, the tournament Committee may take into account all relevant information to determine seeding.

Any vacancy created by the withdrawal of a seed shall be filled by the next highest ranked player in the main draw eligible to be seeded. The position vacated by that next highest ranked player shall then be filled by the next player on the original acceptance list if prior to the commencement of qualifying or by the eligible lucky loser if after commencement of qualifying. Any vacancy created by the withdrawal of a seed which occurs after the release of the Order of Play on the day preceding commencement of play in the main draw shall be filled by a Lucky Loser.

D) Qualifying:

a) Sections and Seeds

The qualifying draw shall be made in sections, and the winner of each section shall be given a place in the main draw. If four (4) qualifiers are required, there shall be four (4) sections; six (6) qualifiers, six (6) sections; and so on. The draw shall be seeded and the selection of seeds shall be consistent with the criteria used for the main draw. Each section shall have two seeded players/teams. The first seed shall be placed at the top of each section; the second seed shall be placed at the top of the second section and so on. The remaining seeds shall be drawn one by one to be placed successively in the last line of each section.

b) Acceptance of Qualifiers into Main Draw

Once the qualifying competition has begun, only those players who ultimately qualify and lucky losers may be accepted into the main draw. The qualifying competition commences when the first ball of the first qualifying match is struck.

c) Drawing of Qualifiers

At the end of the qualifying competition, the name of one qualifier shall be drawn in the mentioned qualifying place in the main draw. There shall be no prior designation of qualifying sections to qualifying places in the main draw. Likewise, when more than one lucky loser is to be inserted into the main draw, their position in the main draw shall be determined by drawing. Vacant places in the main draw determined before the end of the qualifying shall be filled by "lucky losers" in addition to the qualified ones.

) Waiver of Claims:

All players entering any African 14 & U Circuits tournaments agree, as a condition of their entry, that no claims are brought against CAT, the tournament organisers, and the national association sanctioning such events, with respect to any injuries, however caused, or any losses incurred, while travelling to and from, or participating in any CAT circuit. **It is therefore recommended that all players have adequate medical insurance cover.**
